

HOW TO BUILD A CATAPULT

1. Make a stack of popsicle sticks and tie them together on each end with rubber bands.
2. Take two additional popsicle sticks and stack them together. Tie them together on just one end with a rubber band.
3. Pull the two popsicle sticks slightly apart and place the larger stack of popsicle sticks in between them.
4. Tie the large stack of popsicle sticks to just the upper popsicle stick with a rubber band.
5. Tie a plastic spoon to the upper popsicle stick with a rubber band.
6. Place a pom pom onto the spoon.
7. Hold the catapult with one hand and use the other hand to pull the spoon down. Release the spoon to launch your pom pom.
