

Vermeer® VR1428 Wheel Rake

:60 Second Radio – VR1428 Wheel Rake Radio Commercial

Having a successful haying season depends on the performance of your forage equipment ... and if you're using the new VR1428 high-capacity wheel rake from Vermeer, you'll be in good shape, covering more acres in less time.

That's because the VR1428 is bigger, covering swaths up to 28-feet-wide – the entire 28 feet, including the middle with the option center windrow splitter.

There's less wear and tear on rake wheel tines and less dirt and rocks in your hay because of the suspension cylinder on each wheel.

It's easier to maneuver, handling even better than many smaller-capacity wheel rakes because of the way it's closely positioned to the tractor.

It's easier to maintain. Without the springs, chains and push/pull rods commonly used on other rakes.

Most importantly, the VR1428 wheel rake is easier to rely on – because you know it's built by Vermeer.

Come see us today at _____ in _____ and see how Vermeer is helping to reduce the stress of haying season, with high performance forage equipment like the VR1428 high-capacity wheel rake.
