Vermeer 604 Pro Baler

:30 Second Radio:

Seems like everyone is turning pro in the hay and forage industry — thanks to the Vermeer 604 Pro baler.

Pro performance — like the ability to bale wet or dry hay while making bales of varying sizes.

Pro features — like the Xtracut17 Chopper System that precuts the crop into small pieces for better bale density and palatability.

And hydroflexcontrol that allows the floor to flex in heavy crop conditions — or drops down so a plug can be cleared from the cab.

Are you ready to go pro with the Vermeer 604 Pro baler?

Visit your local Vermeer dealer ___(Dealership name)___ in ___(Dealership's town)___ to learn more.
