

**RENTAL EQUIPMENT  
ENGINEERED FOR**

**MORE**

**RENTAL-READY MACHINES**

# BUILT FOR TOUGH WORK

You need equipment that can stand up to the challenges of repeated rentals. Vermeer machines fit the bill. Our diverse lineup of rental equipment is **engineered for durability and reliability**. Because we know your customers want quality equipment they can pick up and put to work right when they need it — and that's what keeps customers coming back.

Yellow iron is engineered for the entire rental cycle, not just time on the job. Maintenance-friendly designs help streamline service so your equipment can take on the next job, rather than sit in the shop.

**“A lot of our customers specifically ask for the Vermeer products. They know the quality is there. The reliability is there. And they’ve used the machines for years.”**

**– Aaron Hodel  
Inside sales manager  
American Rental**

A man with a beard and a tattooed arm is shown in profile, talking on a black mobile phone. He is wearing a light-colored short-sleeved button-down shirt. He is looking down at a spiral notebook on a desk. The background is a bright yellow wall.

# ***CONFIDENCE YOU CAN COUNT ON***

Maintain your rental fleet's performance, longevity and productivity with the Vermeer Confidence Plus® asset protection program.

- **Confidently manage fleet performance:**

Dealer service technicians complete multipoint inspections, using only genuine Vermeer parts during maintenance.

- **Confidently plan maintenance costs:**

Get a single predictable payment for primary service intervals, parts, fluid and labor over the life of the package.

# BRUSH CHIPPER CUSTOMERS WANT TO USE

Your customers need to rent heavy-duty brush chippers. That's where the Vermeer lineup comes in. Our high-performance chippers are engineered for ease of operation, streamlined maintenance and efficient transport from job to job. These machines are also designed with operator safety in mind — including a strategically placed bottom feed stop bar that stops the feed rollers when triggered at the front of the feed table.

What does all that add up to? Dependable, reliable brush chippers your customers can trust on the job.

“

*We work hard 10 hours a day, six days a week. We have Vermeer equipment out there all day, every day, using it 10 hours a day nonstop. It is reliable and it holds up for us — and it really helps us get the job done. ”*

*– Richard Mahoney  
Vice president  
West Coast Arborists*

# STUMP CUTTERS

## MADE TO PERFORM

In 1965, Gary Vermeer introduced the first commercial stump cutter. In the years since, we've continued to build on that legacy, adding innovations designed to boost productivity for your rental customers.

Our lineup includes two cutter wheel options — the Yellow Jacket™ cutter system and the Vermeer cutting system — both engineered for performance and ease of maintenance. Vermeer stump cutters also include an exclusive SmartSweep feature, which helps customers efficiently take out stumps pass by pass (so they can return rentals as soon as possible).

/ SC362 /

/ SC382 /

“

*I'm extremely confident in Vermeer. It's important that I know the teeth are sharp on the stump grinders; the blades are sharp on the chippers. It's all quality.*”

*– Justin Sharum  
Owner, Humble Heart Services

# MINI SKID STEERS

## DESIGNED FOR VERSATILITY

Compact enough to fit on trailers and through backyard gates. Versatile enough to use on nearly every jobsite. Vermeer mini skid steers offer high lift capacity in a minimal footprint, making them a staple for renters. Especially when you pair equipment with a rentable lineup of diverse attachments made for snow removal, digging, lifting and more.

Vermeer mini skid steers are engineered for pros who do tough work, featuring an ISO-pattern joystick and heavy-duty design. The chariot-style ride-on platform — with integrated operator-presence system and three sides of padding — offers maximum visibility and stability while working.

# COMPACT ARTICULATED LOADERS

## MATCHED TO RENTAL WORK

Get more rentals out of one machine. Vermeer compact articulated loaders (ATXs) offer the flexibility of different attachments and all-season capabilities — thanks to an optional climate control system and fully enclosed cab. ATXs are versatile, highly maneuverable machines. The double-H-style telescopic boom provides stability and reach, while low turf disturbance helps leave jobsites like crews found them.

# PEDESTRIAN TRENCHERS

## PREPARED TO GET UNDERGROUND

Effortless steering, maximum maneuverability and high-torque digging. Crews use Vermeer pedestrian trenchers to install irrigation systems, cable and fiber conduit, gas lines and shallow small-diameter drainage tile and to dig perimeter footings.

Optional accessories like a backfill blade or a boring attachment maximize versatility, while toolless access to serviceable components streamlines maintenance when rentals come back to the shop.

# VACUUM EXCAVATORS

## TO ROUND OUT YOUR FLEET

Create more rental opportunities with vacuum excavators. Vacuum excavators combine suction and high-pressure water or air to remove soil from the ground — making them a valuable rental for utility contractors, municipalities, industrial maintenance professionals, landscaping crews and other specialty contractors. A leader in vacuum excavation, Vermeer offers a comprehensive, innovative lineup so you can find equipment matched to your customers' needs.

# PIERCING TOOLS

## CREATED FOR LONG-LASTING PERFORMANCE

Utility work is booming — and there are plenty of ways to get underground. Pneumatic piercing tools, like the Vermeer Hole Hammer®, can efficiently perform small-diameter bores ranging in length from 15 ft to 70 ft (4.6 m to 21.3 m). As one of the first boring tools on the market, piercing tools are proven in helping crews to take on utility work. And if they're just getting started, a rental could be a smart solution.

# PILE DRIVERS

## TO POWER SOLAR INSTALLATION (AND MORE)

There's more to the pile-driving market than you might think. While most pile drivers are being used to help install the racking systems used in solar fields, contractors also use smaller models for guardrails and aboveground pipeline projects. Vermeer pile drivers are engineered for powerful performance, with a compact design that maximizes transportability for renters.
