

## Vermeer® TE Series Tedders

### :60 Second Radio – TE Series Tedders Radio Commercial

When it comes to haying in high moisture climates or areas with above normal rainfall, nothing shortens drying times – and reduces nutritional losses – better than TE Series Tedders from Vermeer.

It all starts with the patented hook tine design. TE Series tedders feature revolutionary hook-shaped double tines that pick up and spread crops more effectively than ordinary straight tines. They're also the only tines in the field today with a 3-year limited warranty.

And with TE Series Tedders you get maximum dry-down every time, thanks to an unprecedented “bottoms up” tedding action that gently flips wetter material on top of drier crop material – instead of just blending it together.

At \_\_\_\_\_ in \_\_\_\_\_ we have a TE Series tedder that's perfect for your operation. The TE170 is ideal for smaller acres and lower capacity needs ... the TE250 and TE330 for a heavier diet of tedding action ... and the new TE490 for big operators, big acres and maximum efficiency.

Come see us today at \_\_\_\_\_ in \_\_\_\_\_ and see how TE Series tedders from Vermeer can help you cover more acres in less time.
