

Vermeer® TM1200 TRAILED MOWER

:30 SECOND RADIO - TM1200 Trailed Mower

Eliminate all those 3-pt mowers with one big swath! In the world of high-volume hay production, efficiency and reliability mean everything. Wider cutting widths reduce time, fuel and manpower. Equipment designed for simplicity and versatility help streamline the process, maximize efficiency and reduce operator fatigue. And that's why the new heavy-duty TM1200 Trailed Mower from Vermeer really makes sense, especially when the high cost of fuel, equipment and labor doesn't. This new wide-swath, disc-style, center-pivot trailed mower is designed with rugged frames, reliable cutting beds, heavy-duty components; and yet, it's easy-to-operate and built rugged for high-production cutting even with lower horsepower tractor requirements. The TM1200 changes everything. It cuts up to fifteen-feet, six-inches wide, like a self-propelled mower conditioner. You can fold it down to less than eight-and-a-half feet. Discover the versatility of center-pivot ... the flex and ground hugging ability of independent cutterbars ... and the protection of a unique patent-pending flotation system. The TM1200 Trailed Mower from Vermeer, available exclusively through your Vermeer hay equipment specialists, _____ in _____.
