

Vermeer RR140 Rotary Rake

:30 Second Radio:

If you're like me, you probably don't turn too many heads walking around town.

But in the field, that is a different story— thanks to my Vermeer RR140 rotary rake.

It's designed to rake fast and efficient in wet or dry hay.

With a maximum raking width of 13.8 feet and low 40 horsepower tractor requirement, this rake turns mowed hay into light, fluffy windrows for quicker dry down.

And if that doesn't turn heads ---- the low price will.
