

MATERIAL SIZE MATTERS.

Let's cut to the chase. Providing optimal material size helps increase feed efficiency in cattle. And that's what the Vermeer Final Cut™ FPX9000 bale processor is built for. Sending bales through multiple cutting points provides true fine-cut capability to deliver an average cut length of 1¼ in to 4 in (3.2 cm to 10.2 cm.) Plus, an optional automatic bale feed system varies the speed of the bale rotation for efficient processing, allowing you to process feed on your own time. Finally, a bale processor built for true feed efficiency.

Vermeer Corporation reserves the right to make changes in engineering, design and specifications; add improvements; or discontinue manufacturing or distribution at any time without notice or obligation. Equipment shown is for illustrative purposes only and may display optional accessories or components specific to their global region. Please contact your local Vermeer dealer for more information on machine specifications.
