Vermeer TM1210 & TM1410 Trailed Mowers

:30 Second Radio:

Talk to people who own or operate a Vermeer 10 series trailed mower and they all have the same complaint: they wish they had more acres to mow.

With cutting widths up to 17.7 feet on the TM1210 and 20.8 feet on the TM1410 — operators are cutting more hay in less time.

And with features — like the Q3[®] Cutter Bar, 2-point Quick Hitch hook up and narrow 9-foot transport width — operating and transporting a large trailed mower has never been easier.

It's what makes a 10 series trailed mower a 10.
